

Minutes of May 14, 1997 ACPB Meeting

Approved May 21, 1997

Present: Cederberg, Lembke, Robinson

Software Development and Ownership

The main portion of the meeting was spent developing an outline for a draft statement on ownership of software developed by St. Olaf employees. An extensive web search by an ACC student employee turned up two sample policies - one of which provided ideas for the ACPB outline.

Updates:

Roberta will meet with Alan Norton next week to discuss the ACC capital budget. As Roberta noted, the major budget items are the wiring of the two remaining residence halls (which has been approved) and the wiring of the Science Center (which is still being considered).

Laser Printing vs. Copying:

In response to a recent e-mail note, Roberta will again remind the community that multiple copies should not be made on laser printers since this method of reproduction is far more expensive than photocopying.

Judy Cederberg, recorder
