

Spring 2005

Alternative Video Projects

Listed below are 26 different videos from a fine series on introductory psychology. Viewing one of these videos and filling out the alternative credit form (available on the psychology department's web page – online documents and links) will be counted as one study's credit toward your research participation. We prefer you actually participate in a study, but these alternatives may help those who cannot find a study at the right time.

Directions:

1. **Write** down the name and call number of the video you want to watch.
2. **Go** to the Psychology department website:
<http://www.stolaf.edu/depts/psych/onlinedocs/index.html> and print out an alternative project credit form.
3. **Go** to the library and check out the video and a set of headphones
4. **Watch** the video in the library's viewing room. Remember there are two videos on each volume.
5. **Write** your comments on the form as you watch the video.
6. **Turn in** the form by placing it in the blue box on the Participation sign-up bulletin board.

The title of the film series is:

Zimbardo, P. (Host). (2001). *Discovering psychology* [Television series]. Santa Barbara, CA: WGBH Boston in association with the American Psychological Association.
