

**During the 2009-10 academic year, if all goes as planned, the old Science Center building will be undergoing renovation. This means that we will be losing a number of classrooms during the renovation and will have to handle course scheduling very carefully to ensure that there is sufficient space for all classes. Please assist us by distributing your department's/program's courses evenly across the 10 standard day/time blocks, and be aware that if you do not, we will be in touch with you about rescheduling.**
