

Comment sheet for CHEM 255

Please make comments (both positive and negative) concerning the class, material, teaching, pace, etc. Be specific in your comments, as this will allow changes to be made more easily. Feel free to make comments and suggestions as the course proceeds. This will allow problems to be fixed before the end of the semester. This form can be given to me or to Karen in Room 336. She will type your comments to insure that they remain anonymous before giving them to me. If you need more forms, please see Karen or download them from the class web page.
