

Examples of E2/ S_N2 Competition

What's the lesson here?

What's the lesson here?

What would you try that might work even better?

Examples of E2/E1/S_N1 Competition

The point: Increasing the concentration of a strong base accelerates the E2 reaction. The E1 and S_N1 reactions still occur, but they become only minor pathways to product.

H: Heathcock, *Introduction to Organic Chemistry*, 1976
